PROFILE

Data and business analyst with experience across product analytics, operational reporting, internal controls, and risk management in high-growth fintech environments. Skilled in SQL, Python, and BI tools, with a track record of building dashboards, automating workflows, and translating complex data into actionable insights for cross-functional stakeholders. Currently pursuing an M.Sc. in Physics at Heidelberg University.

EXPERIENCE

Internal Controls & Business Analyst | 9 Payment Service Bank, Lagos, Nigeria *Jul 2024 – May 2025*

- Designed and maintained the internal controls framework, aligning operational processes with regulatory requirements across banking operations
- Built automated reporting pipelines using Power Automate and SQL, reducing manual reconciliation effort and improving audit readiness
- Collaborated with product, compliance, and engineering teams to identify control gaps and implement data-driven corrective actions
- Developed dashboards in Power BI to track key risk indicators and operational performance metrics

Business Analyst | Kuda, Lagos, Nigeria *Jul 2023 – Jul 2024*

- Supported business and product decisions through data analysis using BigQuery across a rapidly scaling digital banking platform
- Developed automated reporting systems and dashboards to track key performance indicators for operations and product teams
- Collaborated with product and engineering on requirements gathering and process improvements for customer onboarding workflows

Business Analyst | Flutterwave, San Francisco, CA (Remote) *Aug 2022 – Apr 2023*

- Analysed high-volume transactional data across 30+ countries using Amazon Redshift to surface insights on payment performance, conversion trends, and operational efficiency
- Built SQL-based dashboards and automated reporting pipelines, enabling real-time decision-making for cross-functional stakeholders
- Partnered with product and operations teams to define business requirements and improve transaction processing workflows
- Produced regular reports for senior leadership on business performance, revenue trends, and operational outcomes across multiple markets

EDUCATION

M.Sc. Physics | Heidelberg University, Heidelberg, Germany *2025 – Present*

- Coursework: Computational Physics, Computational Statistics & Data Analysis, General Relativity

B.Sc. Physics (Second Class Upper) | University of Lagos, Lagos, Nigeria *2016 – 2021*

- Thesis: Total electron content analysis at equatorial stations (supervised by Prof. Rabi A. Babatunde)
- Formally recognised as equivalent to a German university degree by the Regierungspräsidium Stuttgart (Az. 732 6632/26)

TECHNICAL SKILLS

SQL: PostgreSQL, Amazon Redshift, BigQuery, MySQL

Python: Pandas, NumPy, scikit-learn, TensorFlow

Data Tools: dbt, Power BI, Tableau, Power Automate, n8n

Other: Git, Cursor, Claude AI

CERTIFICATIONS

ISC2 Certified in Cybersecurity (CC)

PORTFOLIO PROJECTS

The God Metric | Global Secularisation

- PostgreSQL star schema and ETL pipeline exploring the relationship between economic development and religious decline across 190+ countries. Data from Pew Research, Our World in Data, World Bank, and World Values Survey.

The Green Miles Problem | EU Logistics Emissions

- Investigation into the carbon cost of last-mile delivery across the EU. Interactive Tableau dashboard visualising emissions by transport mode, distance, and country.

The Attention Paradox | Gen Z Streaming Behaviour

- Data-driven analysis of Generation Z streaming habits, challenging assumptions about short attention spans with patterns from real viewing data.

A/B Test: Checkout Fraud | Experimentation Simulation

- End-to-end A/B testing simulation modelling the impact of a fraud-detection intervention on checkout conversion rates. Statistical power analysis and Tableau dashboard.
